

# Provide Enterprise™ helps RWHAP programs centrally manage eligibility, enrollment, and delivery of care across multiple programs and agencies.

## Optimize the Care Continuum

Gain visibility and collaborate across programs and agencies to ensure appropriate utilization of core, supplemental and ADAP services that lead to improved linkage to care, retention in care and viral suppression.

## Streamline Eligibility and Enrollment

Agencies can determine RW and ADAP eligibility in minutes (not days or weeks), determine enrollment status and eligibility for programs, and quickly process client updates and recertifications, resulting in quicker and uninterrupted access to ADAP and RW services.

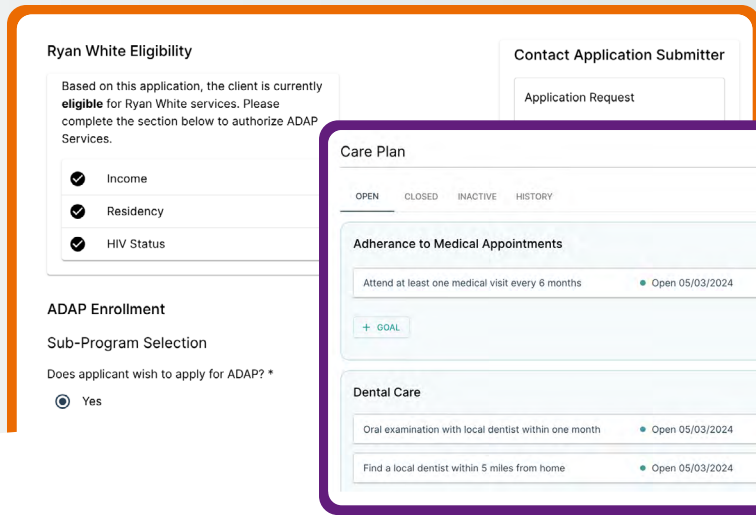

## Meet and Exceed HRSA Requirements

Quickly adapt to changing policy guidance, such as PCN 21-02, and exceed all HRSA performance measures and evolving ADR, RSR and other reporting requirements.

## Improve Operational Efficiencies

Case managers, processors and program staff no longer waste time on outdated processes, leading to a more efficient client experience and leaving more time to continuously improve the effectiveness of processes and services provided to clients.

# Eligibility and Care Management Software Designed for Your RWHAP Programs

## Joint Eligibility and Enrollment

Manage multi-agency eligibility application, determination and enrollment, with automated calculation of core and category eligibility, and ADAP enrollment.

## Collaborative Care Management

Allow care providers from HIV CARE, PrEP, HOPWA, and other programs to collaboratively manage patient care and treatment.

## Data Integrations

Access data from PBMs, IBMs, Medicaid, Lab and other systems to enhance eligibility verification, reporting and care.

## Best Practices

Leverage ongoing product enhancements that stay up-to-date with grant guidance and current best practices from statewide ADAP and regional HIV care programs.

## Actionable Data

Use real-time data reporting and dashboards to support eligibility, enrollment, HIV care and operational decisions.

## HRSA Reporting

Create all required ADR and RSR reports effortlessly—no more spreadsheets or data silos.

## Payment Tracking

Track and reconcile payments to grantees and insurance providers.
